

Sourav Rawat

Senior Android Developer — Kotlin · Jetpack Compose · KMP / CMP

Noida, India · [linkedin.com/in/sourav-rawat-android-dev](#) · [github.com/souravnoobcoder](#)

PROFESSIONAL SUMMARY

Senior Android Developer with 4+ years building high-performance apps and cross-platform SDKs in Kotlin, Jetpack Compose, and Clean Architecture. Architected a single Compose panel SDK that runs inside the video players of tier-1 US sports & entertainment streaming platforms — serving millions of viewers — backed by a Kotlin Multiplatform data layer adopted by the iOS, tvOS, and web teams. Strong in MVVM and multi-module architecture, coroutines / Flow, Media3 / ExoPlayer playback (HLS, Widevine DRM, subtitles), in-app purchases, and partner-facing SDK delivery.

EXPERIENCE

Senior Android Developer — TVID Services

Jun 2024 – Present

Noida, India

- Architected a single Jetpack Compose panel SDK running across Android TV, Fire TV, and Android mobile with platform-adaptive UI — in production inside the video players of tier-1 US sports & entertainment streaming platforms, serving millions of viewers; additional partner integrations in progress.
- Wrote the SDK's entire data / business-logic layer in Kotlin Multiplatform, adopted by the iOS, tvOS, and web panel teams — one implementation of the APIs and business rules instead of four platform rewrites.
- Led migration of an OTT streaming app from Jetpack Compose to Compose Multiplatform — one codebase targeting Android mobile, Android TV, Fire TV, and iOS (pre-release), with adaptive layouts for tablets and iPad.
- Built a Leanback + mobile-compatible SDK powering live streaming for partner streaming apps across Android TV, Fire TV, and mobile; delivered Media3 / ExoPlayer playback (HLS, Widevine DRM, subtitles) and D-pad navigation, and integrated Google Play and Amazon In-App Purchases on a Fire TV streaming app.
- Partner with US-based engineering teams across time zones; author integration guides and sample apps, and ship versioned, backwards-compatible SDK releases guarded by unit, Compose UI, and screenshot tests plus code reviews.

Android Developer — Hitech Global

Jun 2023 – Apr 2024

New Delhi, India · Full-time, Hybrid

- Built TV and second-screen remote-control features using WiFi NSD, sockets, and Android sensors for cross-device pairing with Android TVs.
- Engineered news apps for mobile and Android TV with HLS streaming via ExoPlayer and the YouTube Player API; curated channels and auto-play by category.
- Redesigned a launcher UI/UX with deep linking, increasing user engagement by 35%; resolved critical stability issues to reach a 97% crash-free rate.

Android Developer — Hitech Global

Apr 2022 – May 2023

New Delhi, India · Part-time, Remote

- Contributed to Android TV launcher development (Leanback) and AOSP-related platform tasks.
- Implemented Android cryptography for secure on-device data handling; developed WebView modules integrating HTML / CSS / JavaScript with native bridges.

Android Intern — Hitech Global

Dec 2021 – Apr 2022

- Built video-streaming proof-of-concept apps and a Leanback-based Android TV launcher; contributed to AOSP integration tasks.

TECHNICAL SKILLS

Languages: Kotlin, Java

UI: Jetpack Compose, XML Layouts, Material Design, D-pad / TV UI, adaptive layouts

Media: Media3 / ExoPlayer, HLS, Widevine DRM, Subtitles (WebVTT), ad insertion, AVPlayer (iOS)

TV Platforms: Android TV, Amazon Fire TV, Leanback, custom launchers, AOSP

DI & Data: Hilt, Koin, Room, Realm, SQLite, Firebase

Multiplatform: Kotlin Multiplatform (KMP), Compose Multiplatform (CMP), shared KMP data layers

Architecture: Clean Architecture, MVVM, Multi-module

Async: Coroutines, Flow / StateFlow, RxJava / RxAndroid

Networking: Ktor Client, REST, WebSockets, WiFi NSD, WiFi P2P

Testing & Tooling: JUnit, Compose UI & screenshot tests, Android Studio, Gradle, Git, Play Console

OPEN SOURCE

- RokuFocus (roku-focus-list)** — Jetpack Compose library for Roku-style fixed-focus D-pad navigation on Android TV / Fire TV — grid layouts, wrap-around, key-repeat. Published on JitPack (Apache-2.0).
- adb-dashboard** — Local web dashboard (Python / FastAPI + JS) for managing Android devices via ADB — wireless pairing, screen recording, APK install, shell, live device telemetry.

EDUCATION

Bachelor of Computer Applications (BCA) — Shri Guru Ram Rai University (SGRRU)

2020 – 2023 · 8.43 / 10 GPA
